PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building and scaling web and mobile applications. Strong in JavaScript/TypeScript ecosystems with hands-on work across React/Next.js, Node.js/Express/NestJS, and SQL/NoSQL databases (MySQL, PostgreSQL, MongoDB). Experienced in performance optimization, UI/UX improvements, bug fixing, and deploying/maintaining production apps on Ubuntu VPS using Nginx and PM2. Delivered enterprise-grade solutions including eCommerce, CRM, multi-tenant platforms, and real-time chat systems with secure authentication and notifications.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, Tailwind CSS, Bootstrap, shadcn/ui, React.js, Next.js, Redux, Zustand, GSAPt

Backend: Node.js, Express.js, NestJS, Next.js (API routes), JWT Authentication, Socket.IO

Database: MySQL, PostgreSQL, MongoDB, Prisma ORM

Mobile: React Native (Android & iOS)

DevOps: Git, Nginx, AWS, Ubuntu/Linux, PM2, Docker

WORK EXPERIENCE

FULL STACK DEVELOPER

On Wave Group | Remote

DOVER, DELAWARE, USA

■ August 2024 - Present

- Developed and maintained multiple enterprise software products including 360 Marketing tools, a multi-tenant CRM platform, and a secure real-time chat application.
- Built and improved core application features with a focus on performance optimization, scalability, and production stability through regular bug fixes and refactoring.
- Worked on multi-tenant CRM capabilities where users can manage multiple websites from a single system and edit content dynamically.
- Developed and maintained React Native mobile apps (Android & iOS), ensuring feature parity and reliable notification behavior.
- Collaborated in feature planning and delivery, improving UX flows and ensuring smooth releases across web and mobile platforms.

MERN STACK DEVELOPER

eManager | On-site

J-BLOCK, BARIDHARA, GULSHAN

■ Feb 2023 - July 2024

- Worked on multiple business applications including eCommerce, business portfolio sites, and business solutions such as Inventory Management and ERP systems.
- Improved product quality through continuous bug fixes, UI/UX enhancements, and performance improvements for better user experience.
- Optimized application performance to handle increasing usage and support business growth without dropping responsiveness.
- Managed VPS hosting and deployments, maintaining production environments and ensuring reliability for live applications.
- Contributed to scaling projects by improving backend stability, database usage patterns, and frontend rendering performance.

ACHIEVEMENTS

- Delivered and maintained enterprise-level software solutions across eCommerce, CRM, marketing platforms, and real-time chat systems.
- Reduced application loading time and improved responsiveness through performance optimization and code refactoring.

PROJECTS

FAMILY-CHAT [App Link](#)

Stack: JavaScript, Node.js, Express.js, MySQL, JWT, Socket.IO, Web Push, Data-less FCM, React Native

- Built a secure real-time chat system with JWT-based authentication and Socket.IO messaging.
- Implemented real-time notifications using Web Push and data-less FCM for privacy (mobile fetches message data directly from server).

VESTORA [Live Link](#)

Stack: React.js, JavaScript, Redux, Tailwind CSS, Node.js/Express.js, JWT, MongoDB

- Built a complete eCommerce workflow including product browsing, cart, checkout, and order tracking.
- Developed separate admin & buyer panels: admin can manage stock, orders, and run campaigns, while buyers track orders via dashboard.
